Subject: Expensive cleanup is bad for jobs

Why are we using outdated testing information to make the decision to do the clean up now?

What impact will the clean up have on the river?

What impact will the clean up have on JOBS?

What impact will the clean up have on the financial burden on all of us?

There are too many unanswered questions to move forward without the answers.

Instead of creating a cleanup plan that will take decades and require billions of dollars, I sure hope the EPA will consider the impact it could have on the jobs on the river. We all want a clean river but the cleanup should also be a responsible one.

Please consider my thoughts and approve a plan that's good for our economy.

Sincerely,
